TASER® CAM HD™

The Truth in HD

The TASER® CAM HD™ recorder is an option for use with any TASER® X2™. It provides higher resolution color video, compared with that of the original TASER CAM™ recorder used with the TASER® X26™. The TASER CAM HD recorder electronics have been upgraded to allow for a much greater feature set, with a more enhanced form factor than the original TASER CAM provided. The TASER CAM HD with its microphone and sensitive camera, adds to the X2 the ability to record audio and video, even in low light environments.

TASER™

TASER® CAM HD™ BENEFITS

■ HD 720P HIGH RES VIDEO RECORDING

Records more than 1 hour of full audio and high resolution color video at 30 frames per second in HD 720p format (1280 x 720).

■ AUTO-RECORD

Auto-record mode activates when the Safety Switch is moved to the up (ARMED) position. During the first second of video the device serial number, date and time are displayed.

■ USB DOWNLOAD/RECHARGE

Comes complete with USB download cable and wall charger. Free Evidence Sync software allows for easy download and review of videos.

■ COMPACT DESIGN

Weighs only 3.5 ounces. Manufactured using high strength plastic and IPX2 water resistant.

■ VISUAL WARNING

If the camera lens is blocked, the Central Information Display (CID) on the X2 will flash.

■ REPLACEABLE LITHIUM-ION BATTERY

This rechargeable battery allows users to replace the battery themselves, rather than sending it back to TASER. Battery provides more than 100 firings per charge.
